

Declaration of REACH Compliance

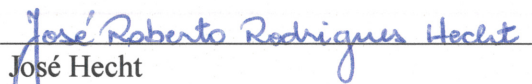

REACH, EC 1907/2006, is the European Community Regulation on chemicals and their safe use. This legislation deals with the **Registration, Evaluation, Authorization, and restriction of Chemical** substances. The law entered into effect on 1 June 2007. REACH obligates manufacturers to ensure specified chemical usage is registered with the European Chemicals Agency (ECHA) in Helsinki, Finland. Registration includes supplying data such as chemical types and uses, volumes per annum, and test data results.

Under the structure of the REACH regulation, Terrasat Communications is a manufacturer of “articles” to our EU customers through several entities located within the EU. We do not manufacture nor supply “substances” or “preparations” and our articles do not involve the “intentional release of substances.” Accordingly, we foresee no registration or preregistration requirement for the products we supply.

As of 20 June 2013, the ECHA had identified 144 “candidate” Substances of Very High Concern (SVHC). Based on our own internal analyses, vendor-supplied analyses, and/or material certifications of the raw materials used in the manufacture of Terrasat Communications products, we declare that all products, and their packaging, do not contain any of these SVHCs in concentration greater than 0.1%. (A full list of banned substances is available at <http://echa.europa.eu/web/guest/candidate-list-table>.)

Terrasat Communications is constantly monitoring substances of very high concern (SVHCs), as defined by REACH, in our products. This will be an on-going process since the complete list of SVHCs will be released in stages.

Sincerely,

José Hecht
